PEREGRINE
PACS

The Need Is Clear

It's not enough to just obtain great diagnostic images. You must be able to view these images, show them to clients, get radiology consults, attach reports to studies, view remotely, share data sets with colleagues and clients and always know your data is secure. These things should all happen seamlessly and quickly without undue effort from your staff.

PeregrineRad.com

Consult | Collaboration | Seamless | Security

Access all of your imaging studies any where in your clinic, or any where in the world.

Share cases with colleagues or clients seamlessly.

Using Peregrine Cloud, cases can be either downloaded or viewed using an online viewer.

Safe and Secure Permanent Archive

Local Hardware You Own, but Peregrine Manages For You

Low Flat Rate for all of Your Data

Direct link to radiologists for over-reads with reports attached to the studies.
